Home Depot Natural Stone Colour Palette 2022

Granite

Granite is a light-coloured igneous rock with grains large enough to be visible with the unaided eye. It forms from the slow crystallization of magma below Earth's surface. Granite is composed mainly of quartz and feldspar with minor amounts of mica, amphiboles, and other minerals. Granite is the best-known igneous rock. Many people recognize granite because it is the most common igneous rock found on Earth's surface and because granite is used to make many objects that we encounter in daily life. These include countertops, floor tiles and more.

Marble

Marble is a metamorphic rock, most commonly limestone or dolomite. Compression of the original minerals causes recrystallization of the carbonate mineral grains. The resulting marble is typically composed of an interlocking mosaic of carbonate crystals. Known for its beautiful patterns and veins, marble has been used in society for centuries as it is easier to work than granite. Due to its softness, marble is prone to more scratching and absorption than granite.

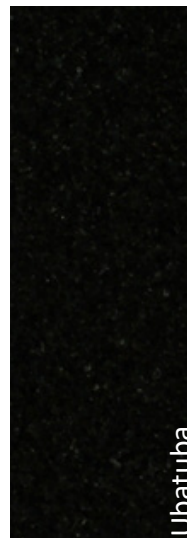

Care and Maintenance

Your natural stone countertops have been treated with an impregnator and do not require any further sealing. Your countertops are easy to clean and maintain with soap and water, or other cleaning products like Windex® and Fantastic®. To treat difficult spots, soak the affected area with one of the recommended cleaning products for up to 10 minutes, scrub the area with a soft cloth, rinse thoroughly and dry.

Group H - Quartzite

NATURAL QUARTZITE NOW AT HOME DEPOT

Harder than granite with the look of exotic marble, natural quartzite countertops offer the best of both worlds. Its strength will ensure natural quartzite countertops will have a long, beautiful life, free of flaws like scratches and etching. This beautiful natural quartzite collection includes traditional, highly varied colors and natural cleft finishes along with more contemporary options.

- Distinct veining, from solid to crystalline appearance
- Stain, heat, fire, scratch, etch resistant
- Very strong & durable
- Virtually maintenance free

HOME DEPOT® WESTERN CANADA NATURAL GRANITE COUNTERTOP **15 year Natural Stone Stain Warranty**

Your custom natural granite countertop has been treated with a very special stone impregnator
And does not require any further sealing or general maintenance.*

For a period of fifteen (15) years from the date of installation, the vendor warrants to the original owner that their Home Depot® custom natural granite countertops will be stain resistant to common food and beverage liquids.

This limited warranty does not extend to the following:

- Variances in appearance
- Dislodged particulates (chips)
- Pitting
- Cracks, cracks due to heat, excess pressure or force
- Scratches
- Chemical abuse
- Marble

If a defect occurs within the warranty period, The Home Depot® vendor will, at its option, repair the defective products. The end user must present the original proof of purchase at the time of making a warranty claim.

For more information or for service call 1-800-506-9997.

No party or agent has the ability to modify this warranty.
